## EDUCATION

**BACHELOR'S DEGREES:** INFORMATION TECHNOLOGY  
**Accra Institute of Technology**

## SKILLS

**Programming Languages:** JavaScript, TypeScript, C#, Python, Dart

**Frameworks:** Angular, React, Vue.js, Node.js, React Native, Express.js, NestJS, Django, Xamarin, Flutter, Next.js, Nuxt.js

**Databases:** MongoDB, PostgreSQL, MySQL, DynamoDB, Firestore

**Tools:** Git, AWS, GCP, Docker, Jenkins, Ansible, Jest, Jasmine, NUnit

## WORK HISTORY

### RHAEOS

#### Software Developer

Jul 2023 to Present

- Utilized recommended mobile development standards to create an intuitive and user-friendly application interface, enhancing user engagement.
- Employed advanced debugging techniques to identify and rectify technical issues, resulting in reduced app crashes and improved user experience.
- Created and implemented a customized error logging system on the AWS CloudWatch platform to track existing App Crashes.
- Developed and maintained serverless applications by crafting efficient and scalable Lambda functions in both Python and Node.js, ensuring seamless execution of critical business logic in a cost-effective and performant manner.
- Created detailed architecture diagrams that visually represented the interaction flow between app components and cloud services, aiding in team understanding and implementation.

### EMINENT TECHNOLOGY

#### Software Developer

Jan 2019 to Jul 2023

- Designed reusable UI components in React and Vue, increasing front-end development efficiency by 25%.
- Developed web applications using React, Angular, Vue.js; and cross-platform mobile apps with React Native, Xamarin, and Flutter.
- Implemented unit, integration, and regression tests, reducing software defects by 40% and lowering technical debt.
- Led development for migration of infrastructure to AWS, reducing infrastructure costs by 30% while improving scalability and uptime.
- Optimized frontend performance through caching, lazy loading, and image optimization, reducing page load times.
- Architected RESTful APIs using .NET and Node.js to power responsive frontend experiences and mobile apps.
- Implemented JWT-based authentication and customizable role-based authorization to ensure security.

### UPWORK

#### Freelance Software Developer

Mar 2018 to Dec 2018

- Integrated 3rd-Party APIs like Stripe, Google Maps, Auth0, Twilio, SendGrid, and MapBox into web and mobile apps for expanded functionality.
- Developed an admin dashboard web application using Angular, Node.js, MongoDB, and Express, providing efficient data management and analytics.
- Built a Flutter-based nightclub app with Firebase for real-time operations. Streamlined guest list, reservations, and promotions.

### HELPING HANDS HOME CARE

#### Web Developer

May 2017 to Mar 2018

- Contributed to the development of responsive user interfaces (UI) using HTML, CSS, SASS, and JavaScript, following web accessibility and responsive design principles.
- Improved the responsiveness of the In-house website by redesigning it using modern CSS Frameworks.

**ACCRA INSTITUTE OF TECHNOLOGY**

**Web Developer Intern**

May 2016 to Feb 2017

- Redesigned school website using modern and responsive architecture.
- Provided user training sessions and documentation for the new internal web portal.
- Added new features to the school's staff management system, improving user experience.
